NSIP enrolled animals

For any animals enrolled in NSIP, your genotypes will be shared with NSIP. NSIP will use them to develop and deliver genomic-enhanced breeding values to the industry.

Allow MSU to use these samples, results and photos for sheep genomics research?

Your flock is never identified in any presentations or publications. Your participation in research is completely voluntary and can be rescinded at anytime. You may be contacted for additional details depending on the specific research aim.

☐ Yes ☐ No

What you're agreeing to

- You own or manage these animals, and the information on your submission is accurate.
- MSU sends the TSUs to its genotyping lab and reports genetic conditions and parentage back to you.
- You'll be invoiced for the TSUs we receive.
- You retain ownership of your animals' genotypes.
- Results depend on sample quality and the information you provide. Some samples may fail and need resampling, and results are reported as-is without guarantee.
- Your contact information and individual flock results will not be shared publicly.

By signing below, I agree to the above and confirm my answer to the research question.
